Pinch bottom bags are the essential packaging solution for bakeries, pastry shops, cafes and fast food restaurants. Our bags are made by state-of-art German machines with an output of 2,000 bags/minute, including with and without gusset are available. These bags are made with food-grade white paper and kraft paper which are recyclable and eco-friendly, and they are printed with non-toxic water-based ink to ensure the safety. We recently developed an innovative pinch bottom bag with perforation and sticker. When the food is packed in the bag, customers can enjoy the food by peeling the top half part of the bag.

Bread & Deli bags with window are mainly used for baked foods such as breads and cakes. With the window bags, the consumers can see the product directly. and this kind of package is very popular in the global market. We offer a variety of window options including perforation. These bags are made with food-grade white paper and kraft paper which are recyclable and eco-friendly, and they are printed with non-toxic water-based ink to ensure the safety.
